PROFILE

Computer Science graduate with research experience in computer vision, time-series modelling, machine learning and resource-aware intelligent systems (TinyML). Co-author of a published article on a value-aware, RF-enabled TinyML architecture for environmental monitoring. Also brings professional experience building production web products and teaching software development.

EDUCATION

B.Tech. Computer Science — Olusegun Agagu University of Science and Technology (OAUSTECH) *2018–2024*

- CGPA: 4.09/5.00 (3.53/4.00 equivalent) | Top 1% of the graduating class.
- Thesis: *"Enhancing Vehicle Speed Estimation Accuracy Using Computer Vision"* (supervisor: Dr. Modupe Agagu).

RESEARCH INTERESTS

Computer vision • TinyML and low-power intelligent systems • Applied ML and time-series modelling • Software engineering

RESEARCH EXPERIENCE

Research Contributor / Co-author — Multi-institutional Research Project | *Nigeria* *Jul 2026–Oct 2026*

Research work: "Value-Aware RF-Enabled TinyML Embedded Architecture for Intelligent Environmental Monitoring in Resource-Constrained Environments: A Computational Experimental Evaluation"

- Co-authored a multi-institutional study proposing a TinyML architecture that scores each environmental observation by severity, prediction uncertainty, temporal novelty and information age, and uses that score to decide whether, and how reliably, to transmit it.
- In a computational evaluation on a real weekly CO_2 time series (with radio behaviour modelled in simulation), the study reported 72.54% fewer transmissions and a packet-delivery ratio of 94.44%, against 70.78% under periodic monitoring.
- Research areas: machine learning, adaptive RF telemetry, Value-of-Information, low-power IoT and efficient on-device intelligence. Published in October 2026 (see Publications).

Research Assistant — OAUSTECH | *Ondo, Nigeria* *Jan 2025–Mar 2025*

Research work: "AI-Driven Weather Prediction Model Using Machine Learning"

- Supported research on AI-driven weather prediction using Long Short-Term Memory (LSTM) networks.
- Performed data preprocessing and feature engineering on incomplete meteorological datasets.
- Conducted cross-validation, error analysis, and comparisons between traditional regression and deep-learning approaches.
- Prepared internal research reports documenting methods, results, and model-performance observations.

Final-Year Research Project — OAUSTECH | *Ondo, Nigeria* *Jan 2024–Sep 2024*

Research work: "Enhancing Vehicle Speed Estimation Accuracy Using Computer Vision" | *Supervisor: Dr. Modupe Agagu*

- Led the design of a speed-estimation model for recorded traffic footage, targeting measurement errors caused by perspective distortion on wide-angle cameras.
- Collected, defined and analysed data to uncover patterns and handle incomplete records.
- Simulated and visualised the model in Visual Studio Code, and presented the findings to peers and faculty members.

Group Research Project — OAUSTECH | *Ondo, Nigeria* *Dec 2022–Mar 2023*

Research work: "Automated System for Solving School Timetable Problems Using Genetic Algorithm" | *Supervisor: Dr. Adeyemi Michael Oduwale*

- Collaborated with a team of students to develop a genetic-algorithm solution that generates academic timetables automatically, minimising conflicts and maximising resource use.

ISA Journal of Engineering and Technology, 3(5), 50–68, 2026 (open access). DOI: 10.5281/zenodo.23337367

PROFESSIONAL EXPERIENCE

Frontend Web Developer — Adaptive Future Technologies | *Ibadan, Nigeria* *Oct 2025–Present*

- Build and maintain React/TypeScript interfaces for production web products, with emphasis on usability, performance, accessibility and maintainability.
- Contributed to performance improvements of approximately 40%, accessibility refactors, cross-browser reliability, and systems supporting 99.9% uptime.

Founder & Product Engineer — Isogun Labs | *Ibadan, Nigeria* *2026–Present*

- Build and launch commercial software products from problem identification through design, engineering, release and distribution.

- Products include Recap and Field Hygiene for the Atlassian Marketplace, spanning dashboards, analytics, data quality, REST integrations and accessibility.

Intern – Field Administrator — Idea Konsult Limited | *Ibadan, Nigeria* *Jun 2023–Dec 2023*

- Assisted clients in assembling and configuring CCTV systems, and set up wireless remote access on mobile devices for over 150 surveillance systems.
- Carried out on-site CCTV installations at more than 100 residential properties.

TEACHING & ACADEMIC ENGAGEMENT

Instructor — Learncity Tech Academy | *Nigeria* *2026–Present*

- Teach a structured 24-week web-development programme through weekly two-hour sessions, covering frontend fundamentals, JavaScript, modern web development and project-based practice.

Front-end Lead & Web Development Mentor — Google Developer Student Clubs (GDSC), OAUSTECH *2023–2024*

- Mentored the club's new intakes on web development (HTML/CSS, JavaScript) and coordinated workshops for new Computer Science students.

Computer Science Peer Tutor — OAUSTECH | *Ondo, Nigeria* *2020–2024*

- Tutored undergraduate Computer Science courses (levels 100–300) for over 200 students, and prepared study materials and past-exam solutions for lower-level students.

TECHNICAL & QUANTITATIVE SKILLS

Programming & Web: Python, TypeScript, JavaScript, React, Next.js, HTML5, CSS3, Tailwind CSS, REST/AJAX
Machine Learning & Vision: PyTorch, TensorFlow, OpenCV, YOLO, LSTM/time-series modelling, data preprocessing, feature engineering, model evaluation, cross-validation
Data & Tools: Power BI, Tableau, Microsoft Excel, Git/GitHub, Jira, Atlassian Forge, Sanity CMS, Vercel, Figma
Engineering: PWA, service workers, WebSocket/BroadcastChannel, responsive design, accessibility, performance optimisation

LEADERSHIP & VOLUNTEER EXPERIENCE

Team Lead, Analysis of Algorithms Group Project — OAUSTECH *Nov 2022–Feb 2023*

- Coordinated a team of 10 students developing a model for applications of the Travelling Salesman Problem across four locations in Nigeria, and presented the model and findings to peers and the project advisor.

Campus CleanUP & Sanitation — OAUSTECH *Jun 2022–Aug 2022*

- Took part in coordinated exercises to clean the campus and its surroundings, reducing litter in public spaces by approximately 40% and promoting environmental cleanliness.

Class Representative — Department of Computer Science, OAUSTECH *Jan 2022–Mar 2022*

- Presented to the department the case for introducing database automation at the campus medical clinic.
- Led the development of a XAMPP-hosted database that lets students access care at the clinic using only their matriculation number.

SCHOLARSHIPS

- Aspire Institute Leaders Program Scholarship *2026*
- Asherkine 2026 TS Academy Tech Scholarship *2026*
- ALX Mastercard School of Software Engineering Scholarship *2022*

CERTIFICATIONS AND AWARDS

- Aspire Institute Leaders Program Award *2026*
- Six Sigma Yellow Belt (SSYB) (Offered by Global Accreditation Body for Six Sigma Certifications) *2025*
- Scrum Fundamentals Certified, SFC (Offered by Accreditation Body for Scrum and Agile) *2025*
- Certificate of Proficiency in Project Management (Offered by Transatlantic School of Management) *2025*

PROFESSIONAL AFFILIATION

- **Member,** International Consortium of Research Staff Associations (ICORSA)

LANGUAGES

- English (Native/Bilingual)
- Yoruba (Native/Bilingual)
- West-African Pidgin English (Bilingual)
- Portuguese (Beginner)
